 - Social and business networking events, statewide gatherings

ADVOCACY

Working together, OCMS leaders and MSSNY legislative experts and lobbyists advise and advance the objectives of physicians with local, state and federal governments. Here is how Onondaga County physicians are affected: The Medical Societies

- Work to curb factors that contribute to exorbitant medical liability costs, which affect all physicians directly through increased costs, even for group employed physicians. In recent years this could have resulted in large cost increases.
 - Give physicians a voice in addressing the major local, state, federal issues such as aspects of the Affordable Care Act implementation. Such issues affect all in the practice of medicine.
 - Ensure that health system reform does not diminish or dilute the physician's role in directing patient care
 - Prohibit inappropriate "economic credentialing" of physicians
 - Ensure that global payments under new delivery models are distributed appropriately and give adequate weight to the value of physicians' services
 - Recognize differences in education and appropriate scope of practice for physicians vs. allied health professionals
 - Restore balance to a system that has allowed insurance companies to profit excessively at the expense of patients and physicians
 - Work to prevent further unfunded mandates
- Online Grassroots Action Center* enables you to contact your legislators and provides sample messages about current proposals that you can modify with your individual concerns and experiences and send by mail or email.
